Stereotypes

"Ensuring access to convenient, private, and affordable STI testing is critical to lowering infection rates and the costs associated with untreated cases, including \$16 billion in direct medical costs to the healthcare system annually."

DR. LIZ KWO, CHIEF COMMERCIAL OFFICER
EVERLY HEALTH

Lower STI rates and reduce costs with accessible and affordable testing solutions

Everly Health offers a comprehensive STI testing solution to screen, treat, monitor, and track the prevalence of STIs. We enable greater access to testing with clinical follow up and treatment through telehealth as needed, digital results for test takers, and results monitoring for your organization.

Everly Health
STI tests enabled
since 2019³

75% of women prefer to screen at home

vs 16% who prefer to screen for STIs in clinic and
8% who prefer their own medical provider⁴

*"It was **easier**, **cheaper**, and more **private** than going to a clinic or lab for the test. I have no reason whatsoever for choosing any other options in the future. The instructions were also very well done."*
