

everly health

Weight Care+

Robust weight care that pairs GLP-1 medication with regular clinician consults, lab testing, and support for related conditions.

CLINICIAN CONSULTS

Virtual video consults to discuss goals, prescription management, and lifestyle support.

ACCESS TO GLP-1s

Assessment for GLP-1 medications that can help eligible users lose up to 15% of their body weight in combination with diet and exercise¹. Concierge service for insurance eligibility and pre-authorization.

AT-HOME LAB TESTS

Quarterly at-home lab test option to routinely monitor heart health and blood sugar levels.*

CONDITION MONITORING

Lab testing, virtual consults, and prescriptions as needed to address high cholesterol and prediabetes.

IN-APP RESOURCES

Access to lifestyle content and digital tracking features to support a holistic weight loss journey.

\$2,505 more annually

Adults with obesity in the United States incur \$2,505 more in annual medical costs compared to those with a lower BMI²
